# Samoa Wireless Outdoor Base Station Production

## Overview

---

How did Samoa become a telecom country?

Samoa was one of the first Pacific Island countries to establish a regulatory infrastructure and to liberalise its telecom market. In 2006, it became the first country in the region to see the market entrance of Digicel, which has since launched services in other Pacific nations.

Which mobile network is best for Samoa?

Vodafone Samoa is Samoa's leading mobile operator and their existing mobile network covers 98.5% of where Samoans live, work and play. Digicel Samoa as well as Fiji, Tonga and Vanuatu markets have all emerged as the winner of the Speedtest Award™ for mobile network speed in the respective countries for the first and second quarters of 2023.

Does Samoa have LTE?

Samoa also boasts one of the highest rates of mobile phone coverage in the Pacific region. LTE is developing on the back of an initial launch of the technology in 2016 by Digicel Samoa, followed by BlueSky Samoa (now Vodafone Samoa) in 2017. Digicel Samoa completed its LTE network in September 2020.

When did Digicel Samoa complete its LTE network?

Digicel Samoa completed its LTE network in September 2020. Digicel Samoa's financially troubled parent company, Digicel Pacific, had been on the lookout for a potential buyer for several months as it struggled financially.

What are Digicel Samoa's 5G upgrades?

The upgrades will start with cell tower sites in Apia CBD, to enable Digicel Samoa to introduce 5G capability for its customers, as well as maintain its existing 4G network.

Why is Samoa a good place to buy a mobile phone?

The advent of competition in the mobile market saw prices fall by around 50% and network coverage increase to more than 90% of the population. Samoa also boasts one of the highest rates of mobile phone coverage in the Pacific region.
