

## SolarInvert Energy Solutions

# Sana electric sanitation vehicle lithium battery pack

## Overview

---

What materials can SABIC provide for electric vehicle battery packs?

Depending on material and design requirements, SABIC's Specialties business can provide a number of materials for electric vehicle battery packs, including bus bar holders, covers, brackets, end plate assemblies and enclosures for battery management systems, control units, fuses and relays, etc.

Why should you choose SABIC for your electric vehicle battery design?

In supporting our customers' flexibility in electric vehicle battery design, SABIC's Specialties business offers a range of injection moldable materials for retaining cylindrical and pouch cell formats.

What materials are used for electric vehicle battery upper enclosures?

NORYL™ Resin, LNP™ VERTON™ and LNP™ THERMOCOMP™ compounds can offer the necessary qualities for electric vehicle battery upper enclosures. Where ultimate strength is required, customers may elect to utilize UD-MAX™ tape in combination with appropriate base materials.
