# **Serbia Communications Wireless Base Station Work**

## Overview

---

How has Serbia's telecom industry been liberalised?

Serbia's telecom industry has been liberalised in line with the principles of the EU's regulatory framework for communications, focussed on encouraging competition in telecom products and services, and ensuring universal access.

What are the major companies in Serbia telecom industry?

Mobilna Telefonija Srbija (MTS), Telekom Srbija, A1 Serbia, Telenor Serbia, Serbia Broadband (SBB), I.KOM, Knight Development Support, Invest-Inženjering, Beogrid, JET TV, Kopernikus Technology, BeotelNet, Posta NET, Sat Trakt, Telemark and Radijus vektor. Download the latest report on the Serbia Telecom Industry.

Why does Serbia have a high mobile penetration rate?

Serbia's high mobile penetration, partly the result of multiple SIM card use, has weighed on revenue growth in recent years, placing further pressure on operators to develop business models which encourage consumer use of mobile data services also in response to the continued substitution of fixed-line for mobile voice calls.

How has the Internet changed in Serbia?

Considerable network investment has been undertaken in Serbia by incumbent and alternative operators in recent years, despite economic difficulties. This has helped to stimulate internet usage, which has also been bolstered by improved affordability as prices are reduced through competition.
