

SolarInvert Energy Solutions

Slovakia downgrades PV module exports

Overview

What is the technical potential of solar energy in Slovakia?

The solar radiation flux achieves a maximum of 1,100 kWh/m². The technical potential of solar energy has been estimated at 5,200 GWh annually, which is about 20 % of the total technical potential of renewable power sources in Slovakia. There is growing demand for supply of photovoltaic power plants and solar panels for installations on roofs.

Is biomass a viable energy source in Slovakia?

Biomass currently dominates electricity generation from renewables, followed by biogas, solar, and hydropower. Despite its high potential, wind energy remains largely untapped in Slovakia due to its perceived instability and regulatory hurdles.

How many solar panels did the EU import in 2023?

In 2023, the EU imported €19.7 billion worth of solar panels, €3.9 billion of liquid biofuels and €0.3 billion worth of wind turbines from extra-EU countries. The value of imported solar panels decreased by 12% compared with 2022 due to a drop in prices, while the quantity increased by 5%.

Should SHPPs be integrated into Slovakia's energy mix?

The integration of SHPPs into Slovakia's energy mix could be a strategic move towards enhancing the country's energy landscape, offering a sustainable and efficient method to increase renewable energy production while contributing to local development and environmental conservation.

What is Slovakia's national energy and Climate Plan?

Slovakia's National Energy and Climate Plan sets an ambitious target of achieving a 19.2% share of renewable energies in gross final energy consumption by 2030.

How did imports affect the value of solar panels compared to 2022?

The value of imported solar panels decreased by 12% compared with 2022 due to a drop in prices, while the quantity increased by 5%. Liquid biofuel imports recorded a 22% drop in value, with a modest 2% decline in quantity.

Slovakia downgrades PV module exports

China exports 235.9 GW of solar panels in 2024

Feb 7, 2025 · China exported 235.93 GW of PV panels in 2024, a 13% increase over the previous year. Of this, 94.4 GW were shipped to Europe, down 7% ...
