Solar Energy Storage Cabinet Super Factory

Overview

Is Tesla building a Megapack energy storage facility in Shanghai?

Tesla has officially commenced construction on a major new facility in Shanghai dedicated to producing its commercial-scale Megapack energy storage units. Chinese state media Xinhua reported that a groundbreaking ceremony was held marking the start of Tesla's self-proclaimed "milestone project".

Where is Tesla's Energy Storage Super Factory located?

Situated in Shanghai's Lin-gang Special Area, the plant marks Tesla's inaugural venture into an energy storage super factory project outside the United States, showcasing the company's rapid advancements in the energy storage sector.

How many gigawatts a year can a solar power plant produce?

The facility was built with an initial annual production capacity of 10,000 units, equal to around 40 gigawatt-hours of energy storage, according to the company.

How much energy does a Megapack store?

Each Megapack unit can store over 3.9 megawatt-hours of energy, meeting the one-hour power needs of 3,600 households. Moreover, a cluster of 200 Megapack units can store 1 million kilowatt-hours, enough to power San Francisco for six hours.

Is Tesla a leader in energy storage?

Since 2015, Tesla has strategically positioned itself in the energy storage industry, witnessing rapid growth and rivaling its electric vehicle sector. Its energy storage products are operating in over 65 countries and regions globally, with total deployment exceeding 10 gigawatt-hours.

How big is Tesla's energy storage capacity?

Its energy storage products are operating in over 65 countries and regions globally, with total deployment exceeding 10 gigawatt-hours. In 2023, Tesla's total energy storage capacity reached 14.7 GWh, with profits nearly quadrupling.
