Solar Inverter Home Inverter

Overview

What is a solar inverter?

A solar inverter is a key component of a solar power system that converts the electricity generated by solar panels (DC – Direct Current) into usable electricity (AC – Alternating Current) that powers your home or business. With technology advancing rapidly, 2025 has brought a new wave of efficient, reliable, and smart solar inverters.

Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.

Do you need a solar inverter?

Solar inverters are a necessary but often forgotten part of a home solar panel system since they convert sunlight into usable electricity for your home appliances. Without a solar inverter, you wouldn't be able to use those solar panels to power your home.

Which solar inverter should I buy in 2025?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025.

What are the different types of solar inverters?

When it comes to home solar installation, homeowners have three types of solar inverters to consider: string inverters, string inverters with DC power optimizers and microinverters. Each inverter setup comes with upsides and

downsides. Here's what you should know.

Which solar panel has a microinverter?

The Q.Tron AC module is actually a solar panel with a built-in microinverter. And, since we named it “Rookie of the Year” in our best solar panels for 2025 ranking, it should come as no surprise that we think they’re the best new inverter on the block too. Q Cells is a well-established solar panel manufacturer.
