

**SolarInvert Energy Solutions**

# **Solar air conditioning configuration in Osaka Japan**

## Overview

---

Does Japan have a central heating & cooling system?

Yes. Central heating and cooling systems are also used in Japan, but these are mostly reserved for big public spaces like hospitals and schools. Unlike the AC that's common in most Japanese homes, these are huge systems that include circulating cooled/heated air through ducts throughout the whole building and are generally less energy efficient.

What are air conditioners in Japan?

So, here's all you need to know about air conditioners in Japan, how they differ from a system like central cooling, and what all those little icons on your air con remote mean. In Japan, most houses and apartments are equipped with air conditioning units, which are single-room units that are comprised of two parts: an outside and an inside unit.

Are solar air conditioning systems a future option?

Such systems might be a future option particularly for sunny climates such as in the Mediterranean zone. Hans-Martin Henning (Ed.), Solar-Assisted Air-Conditioning in Buildings, A Handbook for Planners, Springer, Wien, New York, ISBN 3-211-00647-8.

Why do Japanese homes have a central heating system?

Unlike the AC that's common in most Japanese homes, these are huge systems that include circulating cooled/heated air through ducts throughout the whole building and are generally less energy efficient. Perhaps a big reason why central heating or cooling systems aren't that common in Japan is exactly this, the high costs.

What do you know about solar assisted air conditioning of buildings?

General experiences with installed plants In Task 25 "Solar Assisted Air Conditioning of Buildings", a project that has been carried out in the

framework of the Solar Heating & Cooling Programme of the International Energy Agency (IEA) 11 plants in six countries were monitored. Some important experiences and hints regarding control are:

Can a Japanese air conditioner be installed outside?

Luckily, the installation doesn't require as much work and planning as installing a central system. That said, the outside unit of Japanese air conditioners requires sufficient space outside of your house or on your balcony. Also, you'll need to inform your landlord and get their permission before having the unit installed.
