How many mw subsidized battery storage in Greece?

Home » News » Renewables » Greece awards 188.9 MW for subsidized battery storage in final auction Greece's third energy storage auction has been completed, with nine projects selected and a capacity of 188.9 MW.

What is Greece's third energy storage auction?

Greece's third energy storage auction has been completed with nine projects selected. It was the final auction where the state provides subsidies to build battery energy storage systems (BESS). A total of almost 800 MW in capability has been awarded through all three storage auctions.

How many battery storage auctions will Greece have in 2023?

Beyond the 100 MW limit per project, the RAWEW requires: Greece has planned two additional battery storage auctions for this year. They will be held in third and fourth quarter of 2023. Each one will have a capacity equal to 300 MW. This will bring the annual auctioned capacity to a total of 1 GW.

What is Greece's first battery energy storage auction?

Greece has released its first battery energy storage auction for 400 MW. This is the first competitive process for energy storage in Southeastern Europe. Two more rounds are expected in 2023. The Greek Regulatory Authority for Waste, Energy and Water (RAWEW) has published the country's first round of battery storage auctions.

How to participate in a battery storage auction in Greece?

In order to participate in the auction, developers must submit: Beyond the 100 MW limit per project, the RAWEW requires: Greece has planned two additional battery storage auctions for this year. They will be held in third and fourth quarter of 2023. Each one will have a capacity equal to 300 MW.

How much does Greece's new solar-plus-storage scheme cost?

Greece's new solar-plus-storage scheme has a €200 million budget, which stems from the country's post-pandemic recovery plan. Of this, €35 million of funds are for vulnerable households facing energy poverty.
