Solar photovoltaic module industry extension

Overview

What is Taiwan solar photovoltaic (PV) market outlook?

Taiwan Solar Photovoltaic (PV) Analysis: Market Outlook to 2035, Up. The solar industry's rapid expansion has directly benefitted the market for key components such as PV modules, which make up solar panels that harness solar energy for both residential and commercial applications.

How much is the solar PV module market worth in 2023?

According to GlobalData's Solar PV Modules and Inverters Market Trends and Analysis report, the global solar PV module market was valued at \$102.76bn in 2023. The Asia-Pacific (APAC) region led the charge in 2023, registering \$60.15bn.

Does China still dominate the global solar PV module market?

China continues its dominance of the global solar PV module market. Declining costs of PV module production have made solar installations more affordable globally. Source: [abriendomundo/Shutterstock.com](https://www.abriendomundo.com/Shutterstock.com).

What was the global PV production capacity in 2023?

Accessed March 21, 2024 ; EIA "Annual Energy Outlook 2023." Accessed March 21, 2024. At the end of 2023, global PV manufacturing capacity was between 650 and 750 GW. 30%-40% of polysilicon, cell, and module manufacturing capacity came online in 2023. In 2023, global PV production was between 400 and 500 GW.

What percentage of PV production came online in 2023?

30%-40% of polysilicon, cell, and module manufacturing capacity came online in 2023. In 2023, global PV production was between 400 and 500 GW. While non-Chinese manufacturing has grown, most new capacity continues to come from China. Analysts project that it may take years for production to catch up with capacity.

How is the global solar PV supply chain diversifying?

It finds that efforts to expand crystalline silicon manufacturing in the United States, Europe, Southeast Asia, and India, as well as improvements in recycling and the emergence of perovskite – pioneered by Japan, make the solar PV supply chain more robust. This report analyzes progress in diversifying the global solar PV supply chain.
