

SolarInvert Energy Solutions

South America Photovoltaic Energy Storage Lithium Battery

Overview

The report covers Battery Energy Storage System Manufacturers and it is segmented by Technology (Lithium-ion, Lead-acid, and Others), Application (Residential, Commercial and Industrial, and Utility), and Geography (Brazil, Argentina, Chile, and the Rest of South America). Is South America a key player in the lithium-ion battery industry?

As the global demand for electric vehicles (EVs) and renewable energy storage grows, South America is emerging as a key player in the lithium-ion battery industry. The region is home to some of the world's largest lithium reserves, particularly in Argentina, Bolivia, and Chile—often referred to as the “Lithium Triangle.”.

What are the opportunities for battery energy storage systems in Latin America?

The opportunities for battery energy storage systems are growing rapidly in Latin America. Below are some key details for those who want to understand and succeed in the BESS market. In 2010, the IEA projected that the world would reach its 2019 solar penetration only in 2035. Analysts underestimated solar adoption by 16 years.

What are the top 10 lithium-ion battery manufacturers in South America?

This article explores Top 10 Lithium-Ion Battery Manufacturers In South America; CATL, Companhia Brasileira de Lítio (CBL), YPF-Tec, BYD, LG Energy, Panasonic, SQM, EnerSys, Duracell, and Saft. Last Updated on February 21, 2025.

Where are lithium batteries made?

The region is home to some of the world's largest lithium reserves, particularly in Argentina, Bolivia, and Chile—often referred to as the “Lithium Triangle.” In recent years, several manufacturers in South America have been developing lithium-ion battery production capabilities to meet the increasing demand for sustainable energy solutions.

How much battery capacity will Latin America have by 2023?

While the U.S. was expected to have nearly 60 GWh of installed battery capacity by the end of 2023, AMI estimates that Latin America had less than 1 GWh of operational BESS projects—a 60x difference. This large gap will be bridged at different speeds based on each country's specific regulations.

Does Colombia have a power purchase agreement for hybrid solar & Bess projects?

As of now, Colombia's reliability charge (Cargo por Confiabilidad) has encouraged hybrid solar + BESS projects to progress. Large energy companies have expressed that there are no Power Purchasing Agreements (PPAs) available specifically for stand-alone storage projects, making it harder to finance those projects.

South America Photovoltaic Energy Storage Lithium Battery

photovoltaic energy storage technology in south america
