Overview

Are solar devices a problem in South Sudan?

The second hurdle is the lack of awareness, with 8% of urban and rural populations reporting a lack of knowledge about solar devices. The third barrier to greater penetration of solar devices in South Sudan is poor consumer perceptions of solar product quality.

What percentage of solar lighting products are sold in South Sudan?

Over 85% of these sales have been quality-verified products primarily sold to the humanitarian sector. For the general market, an estimated 80-90% of solar lighting products are sold in Juba (Altai Consulting, 2014). Data on micro and mini-grid development in South Sudan is scarce.

Where can I buy solar panels in South Sudan?

Their largest market is the Central Equatoria state. Founded in 2011 and opened its first branch in Asmara, Eritrea. Branches located in South Sudan, Uganda, and Dubai. In South Sudan, they have shops in Yei, Wau, Juba and Malakal. -Specialise in large solar home systems with a minimum capacity of 600W onwards.

What is the solar market in South Sudan?

Based on the solar access rates and willingness to pay assessments, the total addressable market for solar products in South Sudan is USD 143,431,722, and the total serviceable market is USD 44,052,848. The total potential consumer base is 1,226,483 households, about 90% of the population.

Does South Sudan need a solar home system?

Although the uptake of solar home systems is still nascent within South Sudan, there will be a growing need for waste management and recycling facilities as uptake increases.

How can humanitarian agencies contribute to solar energy in South Sudan?

Refugee contexts in countries such as Jordan have also led to the increased transition to solar energy through donor-led initiatives. Humanitarian agencies can also play a critical role in generating demand for solar systems in South Sudan refugee settlements, where biomass is predominantly used as energy source (Lemi & La Belle, 2020).
