

SolarInvert Energy Solutions

Spanish rooftop solar photovoltaic panels

Overview

Are photovoltaic systems becoming more popular in Spain?

Photovoltaic systems have shown an upward trend again in Spain in the last three years. In 2016, the first tender for renewable energies according to the new model (biomass and wind energy) took place, in 2017 the first photovoltaic projects with a total capacity of 3,910 MW were awarded, which had been commissioned before 2020.

Why should you install solar panels in Spain?

The versatility of solar panels will not only allow you to enjoy solar energy in your home, but they also have multiple uses. Here are some of them: As you can see, solar energy has indisputable potential in Spain. Installing solar panels in Spain means significant financial savings from day one, making you the owner of your energy.

How much photovoltaic power is installed in Spain in 2022?

According to data from Appa Renovables' annual photovoltaic self-consumption report, in 2022, 2,649MW of new photovoltaic power was installed in Spain in self-consumption facilities.

Are solar panels a cheaper alternative source for Spanish homes?

The advances produced in the development of renewable energies have provoked significant decreases in the cost of solar panels, turning solar energy into a cheaper alternative source for Spanish homes. Therefore, talking about prices implies taking into account materials, labour and legal procedures.

Why should you invest in solar energy in Spain?

Here are some of them: As you can see, solar energy has indisputable potential in Spain. Installing solar panels in Spain means significant financial savings from day one, making you the owner of your energy. Similarly, the use of renewable sources such as solar energy leads us to an energy model based

on sustainability.

Why is solar energy growing in Spain?

This strong growth of solar energy in Spain is partly due to the world in which we currently live, increasingly concerned about energy savings and the increase in greenhouse gases in the atmosphere that are harmful to the environment.
