St George Lithium Battery PACK Factory

Overview

Where did St George find lithium?

St George initially enjoyed some success with nickel at its flagship Mt Alexander project in central WA however it attracted the attention of Jayson and other big battery players when it also discovered lithium at Mt Alexander and elsewhere in Western Australia.

What is St George mining's Mt Alexander lithium deal?

St George Mining Limited has announced that it has signed a non-binding memorandum of understanding (MoU) with SVOLT Energy Technology Co., Ltd to consider collaboration on the development of the Mt Alexander lithium project as well as the acquisition of other lithium projects and lithium business opportunities.

Who owns St George mining?

St George Mining has secured key investment from Shanghai Jayson New Energy Materials, the world's leading producer of cathode precursor materials for lithium-ion batteries. Jayson is the world's leading producer of lithium-ion battery cathode materials and is chaired by Chinese clean energy sector investor Feng Liang.

Who makes Jayson batteries?

Jayson is the world's leading producer of lithium-ion battery cathode materials and is chaired by Chinese clean energy sector investor Feng Liang. Liang is also the major shareholder and Chairman of Shanghai Putailai New Energy Technology, a US\$7 billion Shanghai-listed lithium battery anode material manufacturer.

Who makes svolt batteries?

SVOLT is one of the world's largest manufacturers of batteries for electric vehicles and energy storage, with operations in domestic China and abroad

that supply batteries to more than 30 automobile makers and other customers. SVOLT has industry leading credentials in battery innovation, and pioneered the first mass produced cobalt-free battery.

Does St George mining own Jayson?

The investment comes about a year after an initial \$2m investment and the latest move takes Jayson to the top of St George's share register with 11.73 per cent of its stock. St George Mining has secured key investment from Shanghai Jayson New Energy Materials, the world's leading producer of cathode precursor materials for lithium-ion batteries.
