

SolarInvert Energy Solutions

Storage solar battery factory in Switzerland

Overview

To be located on a 20,000 sqm (215,280 sq ft) site in Laufenburg in the canton of Aargau, Erne said the 500MW project will be the world's largest battery storage system. Where in Switzerland will Primeo energy install a battery storage system?

In Kappel, in the canton of Solothurn, we will install one of the largest battery storage systems in Switzerland with a total capacity of 65 megawatt hours. Primeo Energie will use the stand-alone storage system to make energy more flexible and store electricity temporarily and withdraw it again when it is needed.

Which energy storage projects have been commissioned in Switzerland?

Axpo commissioned its BESS in February this year while utility Thurplus commissioned a 3MW system in September last year. But Switzerland was the location for one of the largest energy storage projects commissioned in recent years, a 20GWh pumped hydro energy storage (PHES) unit which started operations in June 2022 in the Canton of Valais.

Where is the world's largest battery storage system located?

To be located on a 20,000 sqm (215,280 sq ft) site in Laufenburg in the canton of Aargau, Erne said the 500MW project will be the world's largest battery storage system. The companies are redeveloping a former Swissgrid building.

How will a large-scale storage system help the Swiss power grid?

In this way, the system will help to stabilise the Swiss power grid. With this large-scale storage system, we are making a decisive contribution to the implementation of Switzerland's Energy Strategy 2050, which aims to convert 100 per cent of its energy supply to renewable energies by 2050.

Can gravity-based batteries help wind and solar power plants reach their full potential?

For wind and solar power plants to reach their full potential, they need storage systems. A Swiss start-up is introducing a gravity-based battery solution. It is an extraordinary energy storage facility that has recently been completed in the Rudong district of Shanghai, China.

Where is the gravity energy storage system based?

The research and development of the gravity energy storage system has been based in Ticino and operational since 2019 with its own R&D centre. The commercial demonstration unit has been connected to the Swiss national utility grid and used for two years of testing and software commissioning.
