

SolarInvert Energy Solutions

Sudan Power Emergency Energy Storage Equipment

Overview

What is power in Sudan?

Power in Sudan Sudan is a country with immense renewable energy potential, possessing a high hydropower potential based totally on its location on the river Nile and other watersheds, a high wind speed mainly in its northern and western region, and high solar radiation throughout the country.

Which sector is the largest user of electricity in Sudan?

The residential sector constitutes 60% of the electricity consumption in Sudan and therefore is the largest user segment. Low price provides almost no incentive for households to conserve energy and wasteful use of power is observed. 9. Sudan is facing power crisis as a result of severe demand-supply imbalance.

Does Sudan have a problem with electricity supply?

Sudan is currently facing a major problem with electricity supply. According to the report “ Tracking SDG 7: The Energy Progress Report (2021) ”, only 54% of the population in Sudan have access to electricity; this indicates more than 20 million people aren’t connected to the national electricity grid .

Who owns electricity in Sudan?

The Electricity Regulatory Authority (ERA) is also part of the MoEP. Most of Sudan’s electricity generation is publicly owned, except for some thermal generations in isolated grids and emergency powership rental, which are operated by Independent Power Producers (IPPs).

Does Sudan have a low electricity access rate?

Even though the energy access rate is low; Sudan is making progress in electrification with annual growth over more than 3 percentage points after 2010; more than 70% of Sudan’s population was lacking access to electricity at that time . Table 1 below represents statistical facts about Sudan’s

electricity access rate from (2000 – 2019).

Is Sudan a good place to use solar energy?

The location of Sudan as part of sub-Saharan Africa enriches the solar potential. The average temperature ranges from 28 to 39°C. The average solar insolation is 6.1 kWh/m²/day, indicating a high potential for solar energy use. The Northern State has been considered as one of the best parts of Sudan for exploiting solar energy.

Sudan Power Emergency Energy Storage Equipment

- ✓ 100KWH/215KWH
- ✓ LIQUID/AIR COOLING
- ✓ IP54/IP55
- ✓ BATTERY 6000 CYCLES
