

## SolarInvert Energy Solutions

# Swaziland 50 MW of solar

## Overview

---

Will Eswatini get a solar power plant in 2022?

In 2022 the Eswatini Government has brought online a 10MW solar plant and will be awarding a solar generation license for the 50 MW to an IPP by late 2023. The government has scrapped the establishment of a 200 MW anthracite coal power plant to be setup at Lubhuku and decided to export the said coal .

Where does Eswatini electricity come from?

The rest of the electricity required is imported from South Africa (Eskom) and occasionally Mozambique (EDM), particularly when issues emerge relating to Eskom's supply. In 2022 the Eswatini Government has brought online a 10MW solar plant and will be awarding a solar generation license for the 50 MW to an IPP by late 2023.

Why did Eswatini change his energy policy?

The changes are driven by Eswatini's desire to improve energy security, access to reliable, adequate, and affordable electricity, and the mitigation of potential detrimental impacts on the environment because of the growing energy demand.

What is the electricity access rate in Eswatini?

The overall electricity access rate in Eswatini is estimated by Power Africa at 83 percent in rural areas and 95 percent in urban areas. GKoE has taken actions to encourage energy battery storage, including offering an SEZ to a company seeking to build a vanadium-flow battery farm funded in part by the Export-Import Bank of the United States.

What is Eswatini Energy Regulatory Authority (Esera)?

The Eswatini Energy Regulatory Authority (ESERA) which regulates the sector (Electricity and Petroleum ) using various instruments guiding the application

of licenses and has in the past engaged with the Southern African Trade and Investment Hub on crafting the independent power-producers policy.
