Tax rate for producing lithium battery packs

Overview

Will lithium batteries get a tax rebate?

According to a statement last week, the export tax rebate rate for some products, including lithium batteries and some non-ferrous mineral products will be reduced from 13% to 9%.

Will China reduce the export tax rebate for lithium batteries & photovoltaic products?

On December 1, 2024, a new policy comes into effect in China, reducing the export tax rebate for lithium batteries and photovoltaic products from 13% to 9%. As a professional deeply engaged in tracking global trade and renewable energy trends, this announcement demands closer examination—not just fo.

What are China's new import taxes on lithium ion batteries?

This includes the removal of import taxes on lithium chloride, lithium carbonate, nickel sulphate, and cobalt carbonate, all previously set at 5%. Additionally, China eliminated the 3% import tax on low-arsenic fluorite, a crucial material for electrolyte production in lithium-ion batteries.

What is the US tariff policy on lithium ion batteries?

In April 2025, the U.S. government updated its tariff policy on lithium-ion batteries imported from China. The current tariff structure includes: A 3.4% global tariff on lithium-ion batteries, regardless of origin. A Section 301 tariff targeting Chinese imports, currently at 7.5%, is scheduled to rise to 25% by January 2026.

Which countries import lithium-ion batteries?

Lithium-ion batteries power various technologies, from smartphones to electric vehicles and grid storage. China dominates the global lithium battery supply chain, producing over 75% of the world's lithium-ion battery cells. The U.S. imports nearly 70% of its lithium batteries from China, making tariffs on

these products highly impactful.

Why are Chinese lithium batteries being tariffed in US-China trade?

Additional tariffs imposed under recent trade actions push the total tariff on Chinese lithium batteries to approximately 82% by 2026. These tariffs are part of a broader strategy to reduce U.S. dependence on Chinese battery imports and encourage domestic production. Part 2. Why are lithium batteries necessary in U.S.-China trade?
