Overview

What should I do if my Base Station is not connected to AC?

If you are seeing a "Power Outage" warning, you'll want to check if there is power at your location, and that the Base Station is properly connected to AC. But if you ever need to replace your Base Station's batteries, you can find a step-by-step guide [here](#).

How do you replace a battery in a base station?

To replace batteries in a SimpliSafe base station, rotate the base counterclockwise (CCW) to remove it, then remove the batteries and replace them while ensuring the (-) and (+) orientation. When disposing of NiMH batteries, they should be recycled.

What type of batteries does the base station use?

Your SimpliSafe Base Station is fitted with NiMH rechargeable batteries, which are constantly recharging as long as the Base Station is plugged in. The base station model is SSBS3.

Why is my base station not working?

Trying to update the firmware might not work because of these issues, making the Base Station unable to work properly. The router might be configured to prevent the Base Station from communicating with SimpliSafe servers. It's a good practice to check to see if the router has restricted or blocked the base unit from connecting to the Internet.

Why does my base station have a power outage?

If you are seeing a 'Power Outage' warning, check if there is power at your location and that the Base Station is properly connected to AC. If the issue persists, you may need to replace your Base Station's batteries. You can find a step-by-step guide [here](#).

How do you remove a NiMH battery from a base station?

Remove the power plug from the bottom of the base station to expose one screw. Remove the screw, rotate the base counterclockwise, and it will pull off. Remove the NiMH batteries and replace them while ensuring the correct (-) and (+) orientation. When disposing of NiMH batteries, they should be recycled.
