

SolarInvert Energy Solutions

Tile photovoltaic house

Overview

The EU-funded TilePlus project designed new roof tiles with embedded tough photovoltaic cells. This would allow millions of homes across Europe to produce their own energy. What are solar roof tiles?

Solar roof tiles are a fully integrated solar system that powers your home. As a solar tile manufacturer, we offer innovative solutions to meet your solar product needs. Each tile has a seamless design that looks great up-close or from the street, complementing your home's natural aesthetic styling.

What is a solar tile manufacturer?

As a solar tile manufacturer, we specialize in providing innovative solar solutions. Our solar tiles integrate advanced solar cell technology and can replace traditional tiles as part of a building's roof, generating clean, renewable energy for your home.

What is a GoodWe solar roof tile?

The GoodWe Sunshine Series is an integrated solar roof tile solution for pitched rooftops to replace traditional solar panels and framework for a sleek, aesthetically-pleasing result, that also maximises your rooftop space for more solar production. The integrated tempered double-glass structure ensures the safety of the roof structure.

How do tileplus solar panels work?

That meant the TilePlus team had to improve the way the panels could produce electricity within that area. Normal photovoltaic cells are covered in horizontal metal thread, which conducts electricity around the panel and out through the cable in the rear.

Should solar panels be installed over traditional roofs?

Solar panels installed over traditional roofs can suffer from weather-related problems and compromise the roof construction. The EU-funded TilePlus

project designed new roof tiles with embedded tough photovoltaic cells. This would allow millions of homes across Europe to produce their own energy.
