Trends in foreign trade of energy storage batteries

✓ 100KWH/215KWH

✓ LIQUID/AIR COOLING

✓ IP54/IP55

✓ BATTERY 6000 CYCLES

Overview

How much battery material does China Import & Export?

China imported almost 12 million short tons of raw and processed battery minerals, accounting for 44% of interregional trade, and exported almost 11 million short tons of battery materials, packs, and components, or 58% of interregional trade in 2023, according to regional UN Comtrade data.

Which country trades the most batteries in the world?

Data source: United Nations Statistics Division, UN Comtrade Note: Excludes trade within regions. China has a major role at each stage of the global battery supply chain and dominates interregional trade of minerals.

Which country exports the most battery cells in the world?

China accounted for 74% of the world's battery pack and component exports in 2023. That same year, China controlled nearly 85% of the world's battery cell production capacity by monetary value. Data source: United Nations Statistics Division, UN Comtrade Note: Excludes trade within regions.

Which country imports the most battery minerals?

China imported 20% of the world's processed battery minerals in 2023, made up of mainly cobalt from Africa. That same year, China exported 58% of the world's processed battery minerals, mainly synthetic graphite to the rest of Asia and Oceania.

What is battery mineral production & raw battery minerals trade?

Battery mineral production and raw battery minerals trade Lithium is produced through brine extraction or hard rock mining, cobalt is primarily produced as a byproduct of nickel and copper mining, and graphite is mined as a natural ore or synthetically produced from pitch and coke.

Trends in foreign trade of energy storage batteries

China dominates global trade of battery minerals

May 21, 2025 · China imported almost 12 million short tons of raw and processed battery minerals, accounting for 44% of interregional trade, and exported almost 11 million short tons ...
