

SolarInvert Energy Solutions

Tunisia Outdoor Power Rescue

Overview

Why does Tunisia need more electricity?

As one of the most climate vulnerable Mediterranean countries, Tunisia's electrical system is expecting increased demand resulting from expanding peak-hour demand patterns, intensifying cooling needs stemming from greater warm spells, and increasing desalination needs.

How many kV power lines are there in Tunisia?

The project will consist of 660 km of 525-kV ACDC overhead lines in Tunisia, 661 km of 525-kV DC submarine cables, and 7 km of 525-kV DC and 400-kV underground cables, terminating at an existing high-voltage substation. Tunisia's power sector is well-developed, with 99.8% of its population having access to the national electric grid.

Are Tunisian security forces failing to protect victims of trafficking?

The experts also raised concerns at alleged failures to identify, assist and provide protection to victims of trafficking, and to ensure access to international protection, as well as at reports that Sub-Saharan migrants, refugees and asylum seekers are subjected to higher degrees of violence by Tunisian security forces.

What drives Tunisia's energy transition?

Three key drivers will dictate Tunisia's energy transition: energy security, given Tunisia's growing energy balance deficit; economics, given the relative decrease in the price of renewables; and environment, given the Country's commitment to reduce domestic greenhouse gas emissions.

Does Tunisia have solar power?

Original licensing: 2020 The World Bank, Source: Global Solar Atlas 2.0, Solar resource data: Solargis. Tunisia has significant solar potential given the country's high irradiance, ranging from 1800 kWh/m² per year in the North to

2600 kWh/m² per year in the South. This equals approximately 1,980 sunshine hours per year.

What are the project regimes in Tunisia?

Depending on the size of the project, Tunisia employs two different project regimes: the Concessions regime, which is applicable for large-scale projects typically designed for energy export, and the Authorizations regime, which is for projects with a maximum capacity of 10 MW, 30 MW, and 15 MW for solar, wind, and biomass projects, respectively.
