

SolarInvert Energy Solutions

Turkish Island Energy Storage Project

Lithium battery parameters

Product capacity: 100Ah

Product size: 135*197*35mm

Product weight: 1.82kg

Product voltage: 3.2V

internal resistance: within 0.5

Overview

Turkish energy firm Margun Enerji, in cooperation with Partner EGS and Huawei, has been preparing to add a two-megawatt-hour capacity battery energy storage system to its solar power plant (SPP) in western Türkiye, which boasts a peak installed capacity of 20.17 megawatts. How big is Türkiye's energy storage capacity?

Türkiye's 35 GWh storage capacity accounts for grid-scale projects alone. Global energy storage investments have surpassed 150 GWh. Türkiye has already begun installations in Hungary, Bulgaria, and Spain, leveraging its geographic advantage close to Europe.

Where does Türkiye invest in energy storage?

Global energy storage investments have surpassed 150 GWh. Türkiye has already begun installations in Hungary, Bulgaria, and Spain, leveraging its geographic advantage close to Europe. Tokcan highlighted the importance of local expertise in manufacturing, system management, and maintenance to avoid dependency on foreign firms.

Can Türkiye become a regional hub for battery technology?

"We believe Türkiye can become a regional hub for battery technology, and our government is committed to making this a reality," Tokcan said. These efforts will position Türkiye as a leader in energy storage innovation, fostering collaboration and supporting renewable energy goals.

Should energy storage regulations be finalized?

Energy Storage Industries Association (EDEDER) President Can Tokcan noted during a press briefing that finalizing regulations is crucial to accelerating investments. "The draft regulation for energy storage has been published, but the final version needs to be issued urgently.
