

SolarInvert Energy Solutions

Turkmenistan invests in solar energy storage

Overview

The technical assistance (TA) will support the Government of Turkmenistan in developing the country's solar energy potential; diversifying its energy mix toward renewables; reducing its reliance on natural gas using new and innovative technologies; and promoting the generation and use of solar energy in the country, including for urban purposes. Does Turkmenistan have solar power?

According to data from the International Renewable Energy Agency, Turkmenistan had no solar or wind capacity installed as of 2021. Its total renewable energy capacity in 2021 was 2 MW, all from hydroelectric power.

Will Turkmenistan achieve its first solar project?

The new project follows the recent launch of a 10 MW hybrid wind-solar project and will help the country achieve the deployment of its first solar projects. Turkmenistan has installed zero solar capacity to date.

Who is developing a 100 MW solar plant in Turkmenistan?

Turkmenistan's state power corporation Turkmenenergo and United Arab Emirates Masdar are currently developing a 100 MW solar plant in Turkmenistan. The new project follows the recent launch of a 10 MW hybrid wind-solar project and will help the country achieve the deployment of its first solar projects.

When is Turkmenistan ready for solar?

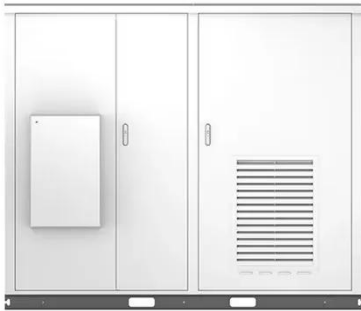

"The document prescribes to begin construction work in July 2022 and to hand over the facility in full readiness for operation in January 2024." According to data from the International Renewable Energy Agency, Turkmenistan had no solar or wind capacity installed as of 2021.

Will Turkmenenergo build a wind-solar park?

In July, Turkmenenergo signed an agreement with Turkish developer Çalık

Enerji Sanaýi we Tijaret A.Ş. for the construction of a 10 MW hybrid wind-solar park, with 3 MW of solar. That plant is located near the recently completed artificial lake Altyn Asyr.
