

## SolarInvert Energy Solutions

# Uganda 600mw energy storage project

## Overview

---

What is Uganda's new power plant?

The new facility, inaugurated on 26 September 2024, boosts Uganda's power generation capacity from 1400MW to 2000MW, a significant step toward meeting the country's growing energy needs. The project, which began in 2016, has been a key component in Uganda's efforts to ensure a stable power supply for both domestic and industrial use.

Which projects have boosted Uganda's generation capacity?

He says that subsequent projects like the 200 MW Kiira Hydropower Station (2003) and the 183.2 MW Isimba Hydropower Project (2019) have further boosted Uganda's generation capacity. "The Karuma Hydropower Project is the latest and most ambitious step in our still ongoing energy evolution," Museveni commented.

Is Karuma Uganda's largest power plant?

Karuma is now the country's largest power installation and also stands as Africa's largest underground power plant. It serves as a cornerstone of Uganda's broader development agenda under the National Development Plan III, which sees energy as a key driver in transforming Uganda from a peasant economy to a prosperous nation by 2050.

Where is Uganda's largest hydropower plant located?

President Yoweri Museveni has officially inaugurated the Karuma hydropower plant, Uganda's largest power generation facility. Located on the Kyoga Nile River, about 270 kilometers north of Kampala, the plant has a capacity of 600MW, generated by six turbines.

How many substations does Uganda have?

As of the month of July 2024, Uganda's total grid length was marked at 4,496.4 km, with 42 substations and a transformation capacity of 6,945.5

MVA. Karuma is now the country's largest power installation and also stands as Africa's largest underground power plant.

How did Uganda get its hydropower?

President Museveni traced Uganda's hydropower journey back to the inauguration of the Owen Falls Dam in 1954, which laid the foundation for the country's energy sector. He says that subsequent projects like the 200 MW Kiira Hydropower Station (2003) and the 183.2 MW Isimba Hydropower Project (2019) have further boosted Uganda's generation capacity.
