Uninterruptible power supply device gb

Overview

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS Devices) Socomec high-performance uninterruptible power supplies (UPS) guaranteeing energy availability and providing power protection for the most critical applications. An UPS is a security guarantee against electrical hazards.

Where are uninterruptible power supplies used?

They are widely used throughout industry and commerce to maintain the safety critical and business critical systems located in process control stations, computer rooms, data centres and server areas. Uninterruptible power supplies are available with a wide range of different efficiencies.

What does a ups do if a power supply fails?

For example, if there is a power failure, a UPS can send a command to switch off the least important loads (such as laser printers) in order to provide a longer backup time for critical equipment. When the power supply is restored, the UPS can send a command to switch these loads back on.

What is a rotary uninterruptible power supply?

Rotary uninterruptible power supply units or packages, with a power range greater than or equal to 200 kVA that use one or more rotating electrical machines (i.e. AC generators) to generate their output voltage when operating without mains input power. To be eligible for inclusion on the ETL, products shall meet the requirements as set out below.

What is a power supply control system?

a) An electronic control system that controls the operation of the product. b) Voltage inverter and rectifier devices (required for static uninterruptible power supplies, optional for rotary uninterruptible power supplies). c) One or more energy storage devices (for example: batteries, flywheels, etc.) specified for

use with the UPS.

What is a UPS modular UPS?

UPS Modular UPS enable the power supply to be sized exactly to requirements, without precluding any future expansion. They are made up of "standard" modules that can be added to existing configurations to increase their power or backup time.
