Uninterruptible power supply equipment BESS in Gothenburg Sweden

ESS

Overview

When will a battery energy storage system be built in Sweden?

Construction has begun on Sweden's largest Battery Energy Storage System (BESS) undertaken by Neoen, an Independent Power Producer and Nidec, a system integrator. The project has been projected to come online in early 2025. Neoen is headquartered in Paris.

What is the largest battery energy storage system in Sweden?

The project is the largest in Sweden which is under construction. Image: Neoen. Independent power producer (IPP) Neoen and system integrator Nidec have started construction on a 93.9MW/93.9MWh battery energy storage system (BESS) in Sweden, the largest in the country.

What is a Bess battery storage system?

A fully EU-made concept for smaller BESS products in Europe. A 500kW / 602kWh battery storage system, fully designed in Sweden, containerized in Gothenburg, and delivered to our client in Örnsköldsvik. The system consists of a fire extinguishing system from Siemens, a Swedish-made EMS, and 42 battery modules of 14.3 kWh.

Which Bess projects are in the pipeline in Sweden?

Most BESS projects in the pipeline in Sweden are 1-hour systems, with the business case still very much centred around ancillary service markets. One of the first European-owned gigafactories for battery cell production, Northvolt's Ett was built in Sweden, and the company is collaborating with Volvo to build the country's second site.

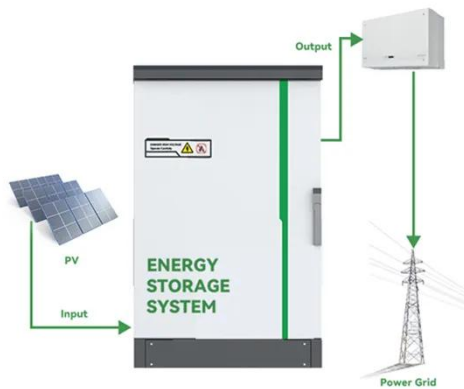

What is the largest Bess project in Sweden?

The 1-hour duration BESS project, called Isbillen Power Reserve, will be the largest in Sweden and the largest in the Nordics by megawatt (MW) power.

Where will a Bess power plant be built?

It will be connected to the 130kV grid area operated by distribution system operator (DSO) E.ON Energidistribution. Nidec will provide the BESS which it will manufacture and assemble in France while the inverters will be built in Italy. More than “half of the value of the project” will be of European origin, Neoen said.
