Uninterruptible power supply equipment in Algiers Hospital

Overview

Why do hospitals need an uninterruptible power supply (UPS)?

That's why we're proud to offer our uninterruptible power supply (UPS). Our UPS provides an uninterrupted power supply to hospitals and other medical facilities, protecting critical equipment, data, and personnel since 2001 for over 500 projects. With our UPS, hospitals can rest easy knowing that their power source is secure and dependable.

What are uninterruptible power systems (UPS)?

Always, also, without prejudice to the technical teams or the patients. Uninterruptible Power Systems (UPS) are a device thanks to which the power supply can be maintained even when abnormal situations occur.

Do health centers have uninterrupted power systems?

In short, from ETKHO we recommend without any doubt that every health center or hospital has uninterrupted power systems that guarantee its work in any of its areas, especially in critical hospital areas, and in any type of circumstance, even in the most critical. Always, also, without prejudice to the technical teams or the patients.

Does etkho have emergency power supply systems?

At ETKHO we have emergency power supply systems that, in the event of failure of the main power system, begin to work automatically in less than 0.5 seconds, thus avoiding any collateral damage, especially for the safety of patients in hospital centers. What are UPSs for?

Critical and complex situations are experienced daily in hospitals.

What types of medical equipment require uninterrupted power supply?

Radiology: Radiology equipment such as CT Scanners, MRI machines, and X-Ray machines require uninterrupted power supply to prevent any loss of data.

Hemodialysis Center/Room: Hemodialysis is a medical procedure that is used to remove waste and excess fluid from the blood of patients with kidney failure.

Why do hospitals need a power supply?

Ensure your equipment is readily available – especially in an emergency – with clean, uninterrupted power. Hospitals and healthcare providers strive to diagnose patients' conditions quickly and effectively, often deploying critical equipment that requires a stable and uninterrupted power source.
