Uninterruptible power supply production in Senegal

Overview

Is Senegal achieving universal energy access?

Khady studying her natural science textbook. Credit: LayeproPhotos / World Bank. With a national electricity access rate of 84%, Senegal is making progress towards universal energy access, yet more than 30 % of rural communities remain disconnected from the grid.

How much energy does Senegal use?

Total fossil fuel provision stands at 27 TWh/year, thereby making up nearly 40% of Senegal's primary energy provision of which the remainder is nearly entirely biomass (well over 50%) - most of which non-renewable - complemented by some coal and some hydro and solar for renewably generated electricity.

Will Senegal become an oil and gas producer in 2024?

This partnership could mobilise up to EUR 2.5 billion to support Senegal's efforts to achieve universal energy access and strengthen a resilient, secure and sustainable energy system that fosters sustainable development and economic growth. In 2024, Senegal is expected to become an oil and gas producer.

What is the Senegal energy access scale-up project?

The Senegal Energy Access Scale-Up Project is building and rehabilitating nearly 4,000 kilometers of power lines and will bring electricity to 200,000 households, electrify 600 health clinics and 200 schools, and ensure that all distribution infrastructure is flood-resilient.

How has Senegal reformed its energy sector?

Since the launch of the Plan Sénégal Émergent, Senegal has adopted reforms designed to attract foreign investment in its energy sector and boost participation from the private sector, while leveraging significant support from

development finance institutions.

When will West African energy open a gas power station in Senegal?

West African Energy, a Senegalese energy company, plans to open Senegal's first and largest 300 MW combined cycle gas power station in January 2024.
