

SolarInvert Energy Solutions

Uninterruptible power supply spare parts include

✓ IP65/IP55 OUTDOOR CABINET

✓ OUTDOOR CABINET WITH
AIR CONDITIONER

✓ OUTDOOR ENERGY STORAGE
CABINET

✓ 19 INCH

Overview

These parts include the rectifier, inverter, batteries, and surge suppressors, among others. What is an uninterruptible power supply?

Before diving into the specific components, it's essential to understand what an Uninterruptible Power Supply is. A UPS is a device that provides emergency power to a load when the main power source fails. Unlike generators, UPS systems provide immediate protection from power interruptions by supplying energy stored in batteries.

What is an uninterruptible power system (UPS)?

As complex devices tasked with ensuring clean power and continuous uptime to your critical load, uninterruptible power systems (UPSs) are comprised of a variety of critical components that wear out during normal operations. Left unchanged, these parts are subject to failure.

What spare parts do I need for my backup power supply?

From replacement capacitors, fans, batteries, air filters, cooling system, alternator or control panel, we can supply the spare parts you need to keep your backup power supply running. All our spare parts are from genuine manufacturers and come complete with warranty.

What is a continuous power supply (UPS)?

Continu protects your business with continuous power and maximising resilience with our Uninterruptible Power Supplies (UPS). Suitable for industries such as data centres, industrial manufacturing and special applications (renewable energy, marine and rail).

What are the three main components of an ups?

In addition to the UPS's batteries, it's important to understand the role played by the three other primary components: the ATS, rectifiers and inverters. An ATS is a device that automatically transfers power from the primary source to

a backup source during a power outage.

Why do medical equipment need an uninterruptible power supply?

Medical equipment: Safeguard lives with uninterrupted power. By stabilising the electricity, an uninterruptible power supply helps your equipment run more efficiently and sustainably and will extend the life of your electrical equipment.
