Vaduz energy storage needs in 2025

Overview

What will storage be like in 2025?

Europe saw a pivotal moment when the grid-scale segment experienced a significant surge, surpassing the distributed segment for the first time. In Latin America, momentum was built as storage deployments increased by 42%. In 2025, emerging markets for storage will be on the rise.

Which emerging markets will lead the storage industry in 2025?

In Latin America, momentum was built as storage deployments increased by 42%. In 2025, emerging markets for storage will be on the rise. Saudi Arabia will lead the charge, fuelled by its expansion of solar and wind generation.

Will Saudi Arabia lead the charge on battery storage?

Saudi Arabia will lead the charge, fuelled by its expansion of solar and wind generation. Our new forecasts for battery storage capacity to be installed over the next decade will show Saudi Arabia leaping up the rankings to become the 7th of the world's 10 largest markets, ranked by capacity addition.

Why is storage demand increasing?

Storage demand continues to escalate, driven by the pressing need to decarbonise economies through renewable integration on the grid and by load increases from data centre demand, manufacturing and increased electrification.

Will energy procurement be a frenzy in 2025?

Expect an energy procurement frenzy in 2025. For the first time in decades, utilities and grid system operators are having to plan for immense load growth. 53 GW of 'large loads' – including data centres and manufacturing facilities – will come online over the next 10 years.
