

SolarInvert Energy Solutions

Vietnam Pack Battery Factory

Voltage range

636V-876V

Rated voltage

768V

Cell type

Lithium iron phosphate

Overview

VinFast Trading and Production Ltd (a subsidiary of Vingroup) and LG Chem Ltd (a subsidiary of South Korean LG Group) on April 5, 2019 officially announced the establishment of their joint-venture company for battery pack production following international standards. Where is a battery factory located in Vietnam?

The pair broke ground on a cell factory last week at an industrial park in Vung Anh Economic Zone, Ha Tinh, Vietnam. Requiring around US\$275 million investment, the 14-hectare production facility will have an annual production output of 5GWh, equivalent to about 30 million battery cells.

When will LFP battery cells be made in Vietnam?

The factory in the Vietnamese province of Ha Tinh will be designed for a capacity of five GWh per year and is scheduled to start production in the third quarter of 2024. The LFP battery cells produced there will be used in VinFast e-vehicles and VinES stationary energy storage systems.

What is Phase 2 of a battery factory in Vietnam?

Phase Two of the factory will expand production to include battery cells manufacturing and upgrade capacity to 1 million battery packs per year. This very first and most advanced battery plant in Vietnam will be equipped with European and American-standard technologies that boast an astounding workflow automation rate of 80%.

Is a battery energy storage system coming to Vietnam?

In September, solar and storage EPC and O&M provider Borrego selected Gotion High-Tech as a supplier of DC-block battery storage equipment for projects in the US, with deliveries scheduled to begin next year. Meanwhile, in Vietnam, the market for battery energy storage systems (BESS) has yet to take off.

Why should you invest in a battery plant in Vietnam?

This very first and most advanced battery plant in Vietnam will be equipped with European and American-standard technologies that boast an astounding workflow automation rate of 80%. Vingroup is also working with strategic partners, include world's leading companies in pioneering technologies for the production of electric vehicle batteries.

How many GWh of battery cells will vines produce a year?

It's expected to produce 5 GWh of battery cells annually. VinES Energy Solutions Joint Stock Company (VinES), a member of VinGroup, and Gotion High-tech, officially broke ground at the joint venture battery factory in Vietnam. This new plant will be crucial to support VinGroup's VinFast ambition to produce and sell electric cars globally at scale.
