Overview

What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

How will GM Vietnam support Vietnam's energy regulatory framework in 2024?

GM Vietnam will continue to help strengthen Vietnam's energy regulatory framework further through the Law of Electricity and Renewable Energy in 2024 to implement PDP8 effectively. We support the country seeking to enhance local energy sector capabilities through trade missions and technical seminars.

How will Vietnam's new energy storage scheme help investors?

Supa Waisayarat, Vietnam's adversary consultant at Thailand's Super Energy Corporation, noted that the new scheme supports the adoption of storage and provides developers and investors with more transparent pricing, which could encourage more power purchase agreements (PPAs) and improve financing confidence.

How can Vietnam improve its energy infrastructure?

Along with that is the need for a better prepared and capable cybersecurity system to enhance Vietnam's ability to protect critical energy infrastructure. Energy storage: Using energy storage technologies will help Vietnam effectively manage the grid and integrate renewable energy sources.

Could Vietnam replace fixed feed-in tariffs with standardized auctions?

As global costs for solar, wind, and battery storage systems fall, Vietnam could

replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean energy at the lowest cost.

How can US companies benefit from Vietnam?

U.S. companies can also benefit from Vietnam's favorable policies and incentives for renewable energy development. Energy efficiency solutions: The PDP8 defined the importance of innovative solutions to address energy and environmental issues. U.S. firms can play a leading role and supply many of the energy-saving solutions Vietnam requires.
