

SolarInvert Energy Solutions

West Asia Double Glass Module

Overview

What is the best double-glass module?

When it comes to double-glass, Trina Solar's double-glass module is the most sought after product in the market. It was one of the first companies to promote and commercialize double-glass modules, and it has won industry-wide recognition for its high quality.

Are double-glass PV modules durable?

Double-glass PV modules are emerging as a technology which can deliver excellent performance and excellent durability at a competitive cost. In this paper a glass-glass module technology that uses liquid silicone encapsulation is described. The combination of the glass-glass structure and silicone is shown to lead to exceptional durability.

What is a double glass c-Si PV module?

Recently several double-glass (also called glass-glass or dual-glass modules) c-Si PV modules have been launched on the market, many of them by major PV manufacturers. These modules use a sheet of tempered glass at the rear of the module instead of the conventional polymer-based backsheet. There are several reasons why this structure is appealing.

Why should you choose double-glass module?

Double-glass module is not subject to potential induced degradation (PID) and boasts excellent durability, low permeability, long life cycle and other superior qualities. Its many advantages have enabled it to yield impressive results in China's Top Runner Program.

What is glass-glass module technology?

In this paper a glass-glass module technology that uses liquid silicone encapsulation is described. The combination of the glass-glass structure and silicone is shown to lead to exceptional durability. The concept enables safe

module operation at a system voltage of 1,500V, as well as innovative, low-cost module mounting through pad bonding.

What is double-glass bifacial module in 2019?

The double-glass bifacial module in 2019 is going to spread its wing starting from the domestic market. Under the pressure of subsidy-free plant development, such modules will be widely applied to utility-scale PV plants and then to distributed PV projects.
