West Asia Energy Storage Container Transaction Price

Overview

What does 'new energy storage' mean for China?

Trade body China Energy Storage Alliance (CNESA) said last week (15 January) that 'new energy storage' capacity reached 78.3GW/184.2GWh by the end of 2024, a term it appears to use to describe technologies other than pumped hydro energy storage.

How much energy storage capacity will China have by 2024?

Separate figures, from the National Energy Administration (NEA) cited in state-owned Xinhua News Agency, said that the total installed capacity of new energy storage projects reached 73.4GW by the end of 2024. With an average duration that indicates a total capacity of around 73.4GW/168GW.

What is container trades statistics (CTS)?

Container Trades Statistics (CTS) offers detailed global Container Shipping data, including TEU volume movements and Price indices down to port level.

How can container trade statistics help UK supply chains?

By utilising Container Trade Statistics data, we are able to monitor and respond to global trade trends and developments, supporting UK supply chains to stay ahead in an increasingly volatile and uncertain market.
