What should I pay attention to when buying a large battery cabinet

Overview

How to choose a battery?

It is advisable to consider warranties and choose a battery with a long period of free replacement. Warranty periods are measured by a figure combining the free replacement period and the prorated period. The prorated period allows for partial reimbursement of the purchase sum of the battery for a limited period of time.

How to choose the right car battery size?

You can find out the battery size required by checking the owner's manual or consulting with your mechanic and then making a comparison between car batteries. The right battery size is the one that fits perfectly in the battery tray securing the battery and preventing damage arising from vibrations. 2. Battery Freshness.

How do you know if a battery is fresh?

Battery freshness is indicated by a code on the battery which consists of a letter and number. The letter stands for the month whereas the number stands for the year of manufacture e.g. B/4 stands for February 2014. You should never buy a battery which is older than six months from the date of manufacture. 3. Reserve Capacity
