Where are the Swisscom 5G base stations

Overview

How many V/M can a Swiss mobile phone use?

And these are only a fraction of the frequency-dependent exposure limit values of 28-61 V/m. The Swisscom mobile network encompasses 5G, 4G and 3G - and enables 99% of the Swiss population to get online.

How can I experience the Swisscom network?

Experience the Swisscom network through our interactive maps. Find out more about mobile phone coverage, fibre-optic expansion and electrical field strengths for every location in Switzerland. You can check which mobile technologies are available at your location. Find out when fibre-optic technology is coming to your community.

Is 5G a sustainable network?

The most sustainable network. Even more sustainable with 5G. Data transmission in mobile communications uses electromagnetic fields. This means that the adaptive 5G antennas transmit directly towards the devices being used - and barely at all in other directions. This reduces overall radiation levels and increases energy efficiency.

How do I know if mobile technology is available in Switzerland?

You can check which mobile technologies are available at your location. Find out when fibre-optic technology is coming to your community. Check how strong the electromagnetic fields are at your location. Check the locations of all mobile communications installations on the map of Switzerland. Check the LoRaWAN coverage where you are.

What is 5G & why is it important?

The best network. Even better with 5G. The fifth mobile generation represents a quantum leap in technology. 5G enables us to enjoy amazing applications in outstanding quality: to stream, game or meet, whenever and wherever, no

matter how many others are doing the same thing at the same time. Mobile communications flyer.

What if you don't use 5G?

Even if you don't use 5G at all, 5G helps to avoid data congestion on the mobile network. (length 01:04 min.) A 5G antenna does not emit any stronger or different radiation than any other mobile technologies. It emits 'non-ionizing radiation'. It may sound mysterious, but you'll find plenty in any domestic kitchen.
