# Where to use the battery cabinet

## Overview

---

What is a battery cabinet?

Battery cabinets are a convenient storage solution that encourages staff to maintain the correct handling and storage procedures. By charging and storing batteries in the one location, you are reducing the likelihood of batteries being lost, stolen, damaged or left in unsafe conditions (such as outdoors).

Are battery cabinets safe?

As lithium-ion batteries have been known to ignite when being recharged, it's important to have a charging station that is free from faults and electrical malfunctions. Battery cabinets are constructed to have intrinsically safe electrical work that reduces the risks associated with recharging.

How to choose UPS battery cabinets?

Furthermore, the cabinets need to offer removable hinged doors so that the UPS system can be easily accessed. Doors need to be locked for safety and security. UPS Battery Cabinets have to be designed to house most front terminal batteries. Your UPS Battery Cabinets should have removable side panels so that cables can be easily installed.

Can a lithium-ion battery cabinet withstand a fire?

To ensure proper safety for lithium-ion batteries, the storage cabinet must withstand an internal fire for at least 90 minutes and be tested and approved to SS-EN-1363-1 for internal fire. It is also essential that the cabinet has integral ventilation.

Why should you have a battery cabinet?

For example, dropping a battery or leaving it in a hot location can result in irreversible damage to the battery cell, which can lead to ignition or explosion. Providing a battery cabinet can reduce these risks by encouraging safe

handling and storing practices within your team.

Can a storage cabinet be used as a charging station?

If a battery storage cabinet is likely to be used as a charging station, it should be built explicitly for this purpose and include all the critical safety measures needed from the outset. It can be more expensive and dangerous to connect charging facilities yourself at a later stage.

## Where to use the battery cabinet
