

## SolarInvert Energy Solutions

# Which PV combiner box is best in Singapore

## Overview

---

What are the different types of PV combiner box?

VRM offers different types of Solar PV Combiner Boxes based on customer requirement. They deal in Array Junction Boxes, string Combiner Boxes, and string Combiner Boxes. The Solar PV Combiner Box is customized based on the input leads from the Solar PV Module and the output lead either to an inverter or a Main Junction Box (MJB).

Why should you choose a combiner box for your PV system?

So, there would be no numerous or long pieces of wires. Apart from that, combiner boxes offer extra protection to your PV system. They come with surge protectors, which protect your inverter from overcurrent and overload. Then they may also come with anti-backflow diodes, which ensure that the battery does not lose charge over time.

What is a DC combiner box?

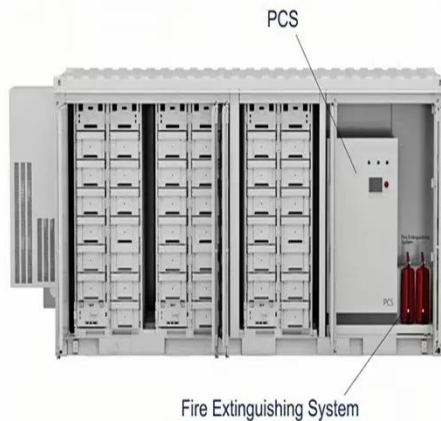

Our DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well string monitoring solutions (I,V, T and SPD and switch isolator status), for PV systems using central inverters with PV panels in trackers and fix tilt systems.

How are PV DC combiner boxes tested?

PV DC combiner boxes are tested according to IEC-61439-2 and are constructed on the basis of the test results as well as assembled for the specific application. This ensures that each of the requirements of the target application is fully met. Do you have any questions?
