Who are the customers of photovoltaic cell module factories

Overview

Who are the top 20 global photovoltaic module manufacturers?

During the conference, PVBL announced its annual ranking of the top 20 global photovoltaic module manufacturers. In 2024, the global solar module market continued to see the strongest players thrive, with the top four enterprises — JinkoSolar, LONGi, Trina Solar and JA Solar — collectively shipping over 320GW and dominating the industry.

What are the key characteristics of global PV module manufacturers?

This report, drawing on the latest developments in the 2025 market, analyzes the key characteristics of the top 10 global PV module manufacturers across four dimensions: technological capability, vertical integration, international presence, and performance in the European market.

Who makes photovoltaic modules in South Korea?

3. Analysis of the Top 10 Global Photovoltaic Module Manufacturers in 2025
Hanwha Q CELLS, the core energy enterprise of South Korea's Hanwha Group—one of the country's top ten conglomerates—has a well-established presence in module manufacturing, R&D, and global market operations.

Who are the top 10 PV module suppliers in 2024?

The Top 10 PV module suppliers (ranked by shipment of own-branded product) in 2024 were all Chinese companies, for the second year in a row. It now seems a long time since the likes of First Solar or Hanwha featured in the Top 10 shipment rankings. To get a look-in these days, annual shipment volumes need to be in the range of 25GW and above.

How has global solar PV manufacturing capacity changed over the last decade?

Global solar PV manufacturing capacity has increasingly moved from Europe, Japan and the United States to China over the last decade. China has invested

over USD 50 billion in new PV supply capacity – ten times more than Europe – and created more than 300 000 manufacturing jobs across the solar PV value chain since 2011.

How many jobs will the solar PV industry create?

The solar PV industry could create 1 300 manufacturing jobs for each gigawatt of production capacity. The solar PV sector has the potential to double its number of direct manufacturing jobs to 1 million by 2030. The most job-intensive segments along the PV supply chain are module and cell manufacturing.
