What is a sub panel?

Sub Panel (Sub-Panel) The Sub Panel can have additional circuit breakers to protect smaller circuits. Usually located in areas that require many circuits, such as workspaces, kitchens, or certain floors. Distributes electricity from the main distribution panel to certain areas or parts of the building.

What are the different types of circuit breakers?

Functions to protect the circuit from excess current and short circuit by automatically cutting off the flow of electricity when a disturbance occurs. Some types of Circuit Breakers include Miniature Circuit Breaker (MCB), Earth

Leakage Circuit Breaker (ELCB), and Residual Current Device (RCD). 2. Fuse.
