# Why does State Power Investment Corporation want to build 5G base stations

## Overview

---

Will China build a 5G base station next year?

Technicians from China Mobile check a 5G base station in Tongling, Anhui province. [Photo by Guo Shining/For China Daily] China aims to build over 4.5 million 5G base stations next year and give more policy as well as financial support to foster industries that can define the next decade, the country's top industry regulator said on Friday.

How much electricity will a 5G base station save a year?

The current 200,000 base stations can save 1.2 billion annually. By the end of this year, 1 million 5G base stations will be built, saving 6 billion in a year. If there are more than 2 million base stations, 12 billion electricity can be saved a year, which is equivalent to China Unicom's total profit in one year.

How many 5G base stations are there in New York City?

At a press conference held on Thursday, the municipal government said the city now has 88,000 5G base stations and is working to build an optical fiber network with a communication capacity of more than 10 gigabits per second (Gbps) and develop 5G-Advanced technologies by the end of 2026.

What is the demand for 5G base stations?

With the growing deployment of the 5G network, demand for 5G base stations is also increasing. Global System for Mobile Communication (GSMA) estimates that 5G networks would be utilized by one-third of the world's population by 2025. In addition, 5G will register around 1.2 billion connections by 2025.

Will Huawei build a 5G base station in China?

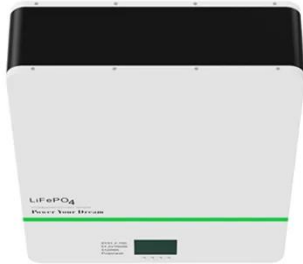

As a result, Huawei is expected to focus its base station construction this year primarily in domestic China. Total 5G base stations in China are projected to exceed 600,000 in 2020, while Japanese and Korean equipment manufacturers aggressively expand in the overseas markets.

Which regions will lead the 5G base station industry?

Europe and North America are forecast to lead in the global 5G base station industry, mainly due to the well-established networking infrastructure in the regions. With the growing deployment of the 5G network, demand for 5G base stations is also increasing.
