

SolarInvert Energy Solutions

24-hour uninterrupted power supply for shopping malls

Overview

How does an uninterruptible power supply work?

The uninterruptible power supplies have e.g. an adjustable maximum buffer time to protect the battery and the unit protects the battery from going into a deep discharge. Draining the battery all the way down can damage it in a very short period of time, especially if this occurs multiple times.

What is the precision power ups battery backup 24-hour kit?

Designed to protect and power Telecom premise equipment, the Precision Power UPS Battery Backup 24-hour kit, offers uninterrupted DC power and increased surge protection with scalable battery technology to offer 24+ hours of on-demand battery backup to all SFU ONTs.

What makes Puls a reliable power supply?

Efficient, compact and reliable DC-UPS from PULS ensure highest system availability. Our uninterruptible power supplies are available with capacitor storage or VRLA batteries. The DC-UPS with integrated electrochemical double layer capacitors are fully maintenance free and guarantee an uninterrupted power supply for periods measured in seconds.

What is a Puls 24 V UPS?

PULS 24 V UPS modules have an optimized battery management system for longest possible battery life. The uninterruptible power supplies have e.g. an adjustable maximum buffer time to protect the battery and the unit protects the battery from going into a deep discharge.

What is a continuous power supply (UPS)?

UPS is the short version of "uninterruptible power supply". In many applications a continuous power supply is important because power fluctuations and outages can cause damage to control equipment as well as unexpected down time. This situation can lead to a loss of productivity and

revenue.

What is a SDU DIN rail DC UPS?

The SDU DIN Rail DC UPS is an advanced 24 Vdc uninterruptible power system that combines an industry leading design with a wide operational temperature range and unique installation options. The SDU DC UPS is a powerful, microprocessor controlled UPS that provides protection from power interruptions.
