What is Growatt Max 70 ktI3 LV?

Email Us?

Growatt MAX 70 KTL3 LV is a three phase solar inverter designed for residential and commercial use. As an inverter, its primary function is to convert the direct current (DC) electricity produced by solar panels into alternating current (AC) electricity that can be used to power homes and businesses.

What happens if a solar inverter input voltage exceeds the threshold?

If the input voltage exceeds the threshold, the solar inverter may be damaged. Note b: If the input voltage is beyond the operating voltage range, the solar inverter cannot work properly. Note c: PV strings connecting to the same MPPT must contain the same quantity and model of PV modules.

What is a Deye 70-110k grid-connected inverter?

The Deye 70-110K grid-connected inverter is suited for medium and large-scale commercial rooftops and ground-mounted solar PV system in which reliability and stability are important. the full series inverter has 30% DC input oversizing ratio and 10% AC output overloading ratio, offering a faster return on investment.
