Are Berlin s 5G base stations shared by telecom operators

Overview

Where is 5G available in Germany?

Currently, Telekom's 5G network is available in Berlin, Bonn, Darmstadt, Munich and Cologne. The cities of Hamburg, Frankfurt and Leipzig are expected to receive the technology by the end of 2019. In June, rival telco Vodafone started to activate the first antennas for 5G networks in the cities of Cologne, Dusseldorf, Hamburg, Dortmund, and Munich.

Is Deutsche Telekom launching a standalone 5G network in Germany?

The high-speed 5G is mainly used in densely populated regions. In addition, Telekom uses the longer-wave 2.1 GHz frequency. Deutsche Telekom expects to launch its Standalone 5G (SA) network in Germany depending on the use cases for the technology as well as the availability of devices, Goldenits recently said in a blog post.

What percentage of Germany has 5G coverage?

Some 92% of Germany receives 5G coverage provided by at least one network operator. The proportion with 5G SA coverage already stands at 90% (as at April 2024). When the first data were collected in October 2021, 5G coverage was just 53%. It has therefore increased by almost 40 percentage points since then.

How many base stations does Deutsche Telekom have in Germany?

German telco Deutsche Telekom's 5G network already reached 55,000 base stations across Germany, the operator said in a release. According to the carrier, its 5G network infrastructure currently covers 85% of the German population. Deutsche Telekom also said it aims to exceed the 90% mark by the end of the year.

What is a 5G standalone network?

These have been increasingly connected to the 5G core network, resulting in a

mobile communications network that is operated exclusively on the basis of 5G technology and referred to as 5G standalone. By creating a complete 5G network infrastructure and using only 5G frequencies, the advantages of the new 5G technology can be better utilised.

Which telco is deploying 5G?

The most active telco in terms of 5G deployments was Deutsche Telekom, which expects to end 2019 with a total of 450 5G base stations across the country, according to recent press reports. By the end of 2020, the number of 5G sites is expected to climb to nearly 1,500.
