Battery cabinet system status error

Overview

Why is my battery-cabinetno not working?

1. The version of the power control modules in [Battery-CabinetNo] is inconsistent with that of the battery packs and needs to be updated. 2. If the update fails multiple times, contact your dealer or technical support. 1. The version of the battery power control modules does not match that of the battery packs, which affects the normal operation.

What is the difference between a ups and a battery cabinet?

The UPS is available in 50 or 60 Hz with various output power ratings while the battery cabinet is available with 16 battery modules. The table below depicts the system model numbers and the stored energy capacity of the system. The End of Discharge Voltage limit for each battery cabinet for all models is 400.8V DC. Table 3.

What if the battery power control module is abnormal?

The battery power control module is abnormal. 1. Check the ventilation and whether the ambient temperature of the [Battery-1/2 battery expansion module-1/2/3] battery expansion modules exceeds the upper threshold. 2. If the ventilation is poor or the ambient temperature is excessively high, improve the ventilation and heat dissipation. 3.

How do I know if a battery string needs service?

THE BATTERY STRING YOURSELF. VOLTAGES ARE ALWAYS PRESENT IN THE BATTERY STRING. If you suspect that a battery string needs service, contact an Eaton service representative. If the string requires service, refer to the battery manufacturer's operating manual for instructions on battery maintenance or contact an Eaton service representative.

Why is my battery not working?

1. The version of the power control modules in [Battery-CabinetNo] does not

match that of the battery packs and needs to be updated. 2. If the update fails multiple times, contact your dealer or technical support. The battery has reached its lifespan. The battery has reached the end of its lifespan.

What if the battery cables are not properly connected?

The battery cables are not correctly connected. 1. Turn off the inverter AC output switch, inverter DC input switch, and battery DC switch, and wait for 5 minutes. 2. Check the cable connections to the [Battery-1/2] power control module by referring to the quick installation guide.
