Brussels Retail Solar Photovoltaic Panels

Overview

Where can I buy solar panels in Brussels?

Several companies offer their services in Brussels, including EmaxSolar, known for its expertise and quality installations. Before purchasing and installing solar panels, it is important to request a solar panel quote.

Are solar panels a good investment in Brussels?

Residents of Brussels with solar panels installed can expect to receive around 10% more green certificates for the electricity generated in 2022 than they did last year. The Region wants to continue to guarantee the repayment of investments in solar over seven years, Bruzz reports, following advice to this effect from energy regulator Brugel.

How does Belgium support solar panels?

Belgium encourages the use of solar energy by offering various forms of financial support. This support makes the installation of solar panels more affordable for many people. Each Belgian region (Flanders, Wallonia and Brussels) offers money to help pay for the installation of solar panels. The amount varies depending on where you live.

Can Brussels residents get a green loan for solar panels?

Under certain income ceilings, Brussels residents can get a green loan for the installation of solar panels with an interest rate between 0 and 2%. Citizens looking to invest in renewable energy can check the potential of their roofs via the solar map of Brussels Environment, and get free advice tailored to homeowners, co-owners and SMEs.

Does Belgium pay for solar panels?

Each Belgian region (Flanders, Wallonia and Brussels) offers money to help pay for the installation of solar panels. The amount varies depending on where you live. Go to an online simulation to find out more. In Wallonia, for example,

this aid can cover a large part of the installation costs.

Can you install solar panels on a roof in Belgium?

Installing solar panels on your roof is a (very) cost-effective operation. In Belgium, there are a number of subsidies to help cover the cost of installing solar panels. You can also choose the model of the self-consumption of energy produced by panels, which is also very advantageous.
