Configuration of the West Asian Super Rail

Overview

How has Hong Kong's rail network changed over the years?

Hong Kong's rail network is being transformed by the Shatin to Central Link project, with one of those changes being the expansion of trains on the West Rail line from 7 to 8 cars. Some history.

When will West Rail be completed?

On the 11 th December, 1996 Mr Siu, the Secretary for Transport announced that the construction of West Rail would proceed in two phases. Phase I of the system would comprise the domestic passenger line from Yen Chow Street to Tuen Mun Centre to be completed to Yuen Long by 2002 and then to Tuen Mun by 2003.

How many passengers can a Hong Kong West Rail train carry?

The interior of the trains are spacious and able to carry 335 passengers. The trains will be formed of 7 cars, due for delivery during 2001. 11.5km of the new line will be in tunnel. The first new train is delivered to the Hong Kong West Rail project. The West Rail route.

What is West Rail?

West Rail was conceived as a result of the 1994 Hong Kong Government Railway Development Strategy. The report found that a new railway was required to meet the transport demands of Hong Kong's rapidly developing western corridor portion of the New Territories. This railway was envisaged to provide:.

How does West Rail work in Kowloon?

West Rail reduces journey times between Tuen Mun and urban Kowloon to 30 minutes and is fully integrated with other public transport. The southern terminus at Nam Cheong will also be served by the MTR Tung Chung line, both served by an underground concourse.
