Dodoma restricts lithium battery energy storage

Overview

Will China restrict the export of lithium-ion batteries?

- Envision beats rivals in wind power bids In focus: China mulls export restriction on battery technologies What's new: China is considering restricting the export of some technologies used in the production of lithium-ion batteries, the core power source for electric vehicles (EVs) and critical for the global clean energy transition.

Will China ban lithium iron phosphate & Lmfp battery cathodes?

So, the news that the Chinese Ministry of Commerce has proposed an unprecedented export ban on technologies critical to producing Lithium Iron Phosphate (LFP) and Lithium Manganese Iron Phosphate (LMFP) battery cathodes has caused some disquiet.

Is the battery ban all doom and gloom?

According to industry experts, it is not all doom and gloom: the ban presents both challenges and potential opportunities for Western battery manufacturers. Behnam Hormozi, CEO of Integrals Power, is an advocate for increased production of non-Chinese LFP and LMFP cathode manufacturing technologies.
