

## SolarInvert Energy Solutions

# EK inverter 50kw

## Overview

---

What is a 50kVA solar inverter?

A 50kVA solar inverter is an intelligent and multifunctional power conversion and supply device which consists of a solar charge controller, a rectifier, and an inverter. It has multiple power point trackers, a wide input voltage range, an integrated data logger as well as RS485/Wi-Fi interface.

What is a solar power inverter?

The Solar Power Inverter 50kW Hybrid On-Off Grid Inverter is a versatile and high-performance solution for large-scale solar energy systems. Featuring 4 integrated MPPTs with a string current capacity of up to 20A, this inverter maximizes energy harvesting and system efficiency.

How many MPPTs does a solar power inverter have?

Featuring 4 integrated MPPTs with a string current capacity of up to 20A, this inverter maximizes energy harvesting and system efficiency. The Solar Power Inverter 50kW Hybrid On-Off Grid Inverter is a versatile and high-performance solution for large-scale solar energy systems.

What is a high power 50kW grid tie solar inverter?

High power 50kW grid tie solar inverter converts 200-820V DC to 3 phase 380 volt, 460 volt and feed the power into the grid, high reliability due to perfect protection function, powerful communication interfaces, easy operation and installation.

What is the cooling method of 50 kW on grid inverter?

The cooling method of 50 kw on grid inverter is cooling fan. And strong IP65 protection, completed sealed cover of 3 phase grid connected inverter suitable for harsh environment.

How many kilowatts is a grid tie inverter?

With a power capacity of 50 kilowatts, this three phase grid connected inverter is typically used for medium to large-scale solar installations, such as in commercial buildings, industrial facilities, or large residential complexes. LCD display, convenient for the user to monitor main parameters of grid tie inverter.
