# Home energy storage export data

## Overview

---

How much did energy storage inverters export in September 2023?

In September 2023, the domestic exports of energy storage inverters amounted to \$650 million, marking a 33% year-on-year decrease and a 6% month-on-month decline. The number of PV and energy storage inverters exported in September stood at 3.91 million units, down by 23% compared to the previous year and 3% on a month-to-month basis.

How much solar & energy storage inverters are exported to South Africa?

Export amount of solar and energy storage inverters to South Africa in September reached \$180 million. This showed a 54% year-on-year decrease but a notable 11% increase on a month-to-month basis, accounting for 3% of the total export value. - Exports of solar and energy storage inverters to Brazil in September amounted to \$270 million.

Does China export energy storage inverters?

The General Administration of Customs of China (GACC) recently released the import and export data for inverters in September 2023. In September 2023, the domestic exports of energy storage inverters amounted to \$650 million, marking a 33% year-on-year decrease and a 6% month-on-month decline.

How big is non-hydro energy storage in 2024?

In the first three quarters of 2024, newly operational non-hydro energy storage installations reached 20.67 GW/50.72 GWh, representing year-on-year growth of 69% in power capacity and 99% in energy capacity.

How much battery storage does Germany have?

Residential storage accounted for 88% of new installations in both Q3 and year-to-date figures (by energy capacity). By September 2024, Germany's cumulative battery storage installations totaled 10.3 GW/15.9 GWh, with residential systems making up 85% of the total.

What was the average bid price for non-hydro energy storage systems in Q3?

In the first three quarters, the average bid price for domestic non-hydro energy storage systems (0.5C lithium iron phosphate systems) was 622.90 RMB/kWh, a year-on-year decline of 50%. While bid prices remained relatively stable in the first half of the year, they reached a historic low of 578.11 RMB/kWh in Q3, particularly in September.
